

IN SPAIN

Armacell supports national face shield production

In Q2 2020, Armacell donated insulation material with antimicrobial protection for the manufacturing of 16,000+ face shields across the Iberian Peninsula.

ArmaFlex with built-in Microban® antimicrobial protection makes it the ideal solution for Personal Protective Equipment (PPE). This innovative technology reduces the growth of microbes throughout the entire lifecycle of a product.

BEGUR

Talleres Xuquer – transformed the material, permitting the manufacturing company to supply thousands of protective screens.

Grupo Gráfico Alzira – prepared the PPE using a self-adhesive AF/ArmaFlex strip that provides comfort and safety for healthcare workers.

Disclima – one of our clients in the Valencian Community – facilitated the supply of ArmaFlex rolls to the manufacturing company.

Dedicated to healthcare: Armacell's flexible equipment insulation contributes towards a safer and more comfortable environment for patients and healthcare workers.
